KEY FEATURES

- 7 Year Warranty
- Delivered fully assembled

PRODUCT DESCRIPTION

Providing you with everything a standard A2 BeamBox light box can do, but with the ability to quickly and easily set the desired working angle.

A2 Beam Box with added flexibility for quality control.

The welded steel Priory stand provides 13 different working angles and is finished in midnight black which looks great against the bright white of the light box.

For added durability a toughened glass screen can be specified. This is great for craft or product inspection where metallic objects or tools are being regularly used on the surface of the screen.
